

Wipe  
the **germs**  
away.  
Every day.

“... disinfectant wipes will gain bigger market share in 2011 due to convenience and efficacy against a wide spectrum of microorganisms.”\*

Cross contamination of hard surfaces happens anywhere people work and play.

Assisted living facilities and nursing homes, doctors’ offices, daycare centers, grocery stores and fitness centers demand and require ease of use – and peace of mind – when it comes to protecting the health and safety of their building’s occupants. We will help you deliver. Spartan’s new **Hard Surface Disinfecting Wipes** reduce 99.9% of germs in as little as 15 seconds – and kill H1N1, MRSA, Staph, Strep and other microorganisms in as little as 5 minutes.

For more infection prevention strategies, contact your Spartan regional manager.
